

IOSH Managing Safely

Three Day Course

Course introduction

Managing safely is aimed at managers and supervisors in any sector, and any organisation. It's designed to get managers up to speed on the practical actions they need to take to handle health and safety in their teams. Importantly, Managing Safely makes a powerful case for health and safety being an integral part of day-to-day management and business. This course is a nationally recognised and respected certificate for managers and supervisors. It is designed and quality-controlled by IOSH, the Chartered body for health and safety, and covers two key areas - health and safety plus environmental basics.

Assessment and Accreditation

IOSH Assessment

At the end of the course there is a 45-minute closed book assessment consisting of 25 questions.

IOSH Project

As part of this course, you will complete a risk assessment project within your own work environment. The completed project must be submitted to Jarrold Training within 14 days of completing the course. A pass mark of at least 60% is required in both the assessment and project to enable an Institute of Occupational Safety and Health (IOSH) certificate to be issued.

Course outline

Memorable and thought-provoking facts and case studies help drive the points home over the whole course. Each module is backed by crystal-clear examples and recognisable scenarios, and summaries reinforce the key learning points of:

- Assessing and controlling risks
- Understanding your responsibilities
- Identifying hazards
- Investigating accidents and incidents
- Measuring performance
- Protecting our environment

About IOSH

IOSH, a Chartered body, is the guardian of health and safety professional competence. The Institution regulates and steers the profession, maintaining standards and providing impartial authoritative guidance on health and safety issues.
